

# SilkBalance

## Once a Week:

1. Add 4 ounces of SilkBalance into filter compartment. Run jets for 1 minute. (Always shake REALLY REALLY well before pouring.)
2. Add 2-3 teaspoons of Chlorine into the body of the hot tub.

## Every Other Spa Use:

1. Add **2 ounces of Activate every other use** either before you get in your hot tub OR when you get out (whichever you prefer).

## Once a Month:

1. Rinse filters thoroughly and rotate position in hot tub if you have more than 1 filter. OR If you have ceramic filters run them through the dishwasher - no soap! Turn OFF the Heat Dry Cycle.
2. Every time you refill your hot tub, rinse filters the first 3 weeks.

## Once Every 4 Months:

1. Drain & refill your hot tub with new water
2. Replace **Silver Ion Cartridge** with a new one
3. Soak filters in **Filter Cleanse** to remove build up of any soaps, oils and lotions.
4. Clean & condition hot tub cover with **Cover Shield**

**That's How Simple It Is! • No Water Testing • No Other Chemicals!**

## Procedure to Convert to SilkBalance

### 5 Simple Steps:

1. Remove filters, soak with **Filter Cleanse**, rinse.
  2. Pour **Jet Clean** (purging agent) into hot tub and run all jets for 1 hour.  
**NOTE:** If there are two jet pumps, run both during this cycle, not just the pump activated by the Clean Cycle. Turn all diverter valves to each position while running jet pumps to ensure circulation through all plumbing. Let hot tub sit for 12-24 hours. Then run all jets for 10 minutes again. Drain hot tub. Rinse hot tub thoroughly with hose.
  3. Return filters to hot tub. Refill hot tub. (Remember to put the hose into the filter compartment when filling hot tub. Use an inline hose filter when possible.) Insert new **Silver Ion Cartridge** into filter area.
  4. Shake **SilkBalance** REALLY well. Add 4 ounces into filter compartment and run jets 1 minute.
  5. Add 2-3 teaspoons of **Chlorinating Granules** into body of hot tub and run all jets for 10 minutes.

## Important Instruction for the first 3 weeks using SilkBalance

### Each Week:

1. Remove filters and rinse thoroughly.
  2. Return filters to hot tub. (Filter discoloration is normal.)
  3. After 3 weeks, return to regular filter maintenance once a month.
